Fiifi Yawson

Full-stack Web Developer

I am a full-stack web developer with about 2 years experience providing value and satisfaction to companies and business owners. I have worked in different industries and understand the dynamics and what it takes to build a good website. In my work, quality and delivery comes first. I am known for my fast work delivery, problem solving skills, critical thinking and passion for what I do. I Thrive working as a team member and also by myself. I have developed the skills necessary of effective communication and collaboration over the years, working closely with inspirational developers, designers and other colleges. I enjoy solving challenging problems, expecially if it potentially benefits people. Software allows me to provide value to people world wide, thus why I love to programme.

WASSCE Certificate , Technical Skills

Work Experience

Software Engineer • JustGo Health

October 2023 - Present

Working at JustGo Health, a healthcare company, My roles are to

- build a web app (which I'm not allowed to give details due to a contract)
- Maintain their existing websites (https://justgohealth.vercel.app/).
- Communicate with other developers to implement new features to their websites.

Web Developer • Bismuth Technologies

February 2023 - Present

Working at Bismuth technologies, a startup studio, my duties are to

- Build responsive, professional and highly-performing websites with languages and frameworks such as

React, Node.JS, JavaScript, HTML and CSS.
- Make sure code is deployed on time.
- Manage existing code bases, debug errors and refactor code.
- Collaborate with designers and other developers to achieve the set goal.
- Utilize tools such as Trello, Figma, Git and GitHub to facilitate collaboration between other developers and designers.

Web Developer Intern • Bismuth Technologies

October 2022 - February 2023

Working as an intern at Bismuth Technologies,

- I built a lot of front-end only projects.
- I debugged errors in code.
- I mostly built the MVP of the front-end and helped with the continuous improvement of the site.
- I communicate with designers to get the needed results.

Agile Web Developer Intern • Xcelsz

October 2022 - March 2023

Interning with a remote start-up company such as Xcelsz,

- I helped with the building of various pages on various websites.
- Built and managed existing code bases in PHP, HTML, JavaScript, CSS, React, SQL, etc.
- I used Atlassian apps to help to collaborate with the team; tools such as Trello, Jira, Slack, Confluence, etc.
We also utilized Figma, Git and GitHub to help collaboration between developers and designers.

I also took part in productive activities such as
- Peer Reviewing
- Testing code
- Making quick spikes to help avoid future errors and blockages.
- Making decision and actively participating in the overall planning of sprints during meetings.
- I made sure to communicate effectively with teammates to help with collaboration and to avoid blockages.

All this was done in collaboration with a team of young developers, QA Tester, UI/ designers, etc, working together remotely with the Agile/Scrum development framework.

My Tech Stack
